Gold Apple Token (GAT)

A pioneering asset on the BNB network, leveraging BEP20 standards and backed by real gold reserves. GAT represents a unique blend of Gold Apple's gold production legacy with the innovative capabilities of blockchain technology.

This combination offers a new standard in the efficiency, security, and trust of gold trading and storage on the blockchain. GAT enables direct exchanges through Gold Apple's blockchain wallet, embodying ownership tied to tangible gold assets, with each token issuance meticulously recorded, ensuring transparency and individuality.

Key Features

Fungible

Convertible or redeemable via GAT into a range of Gold Apple products. This makes GAT tradable against traditional gold products. This portion of GAT can be cashed out through interpersonal transactions.

Price Stability

Representing physical gold, GAT offers token holders risk diversification and hedging against market volatility at superior credit quality while avoiding costly conversions between fiat and crypto.

Scalable

GAT are-through the Gold Apple wallet-supported by physical gold held in Gold Apple's inventory, allowing for billions of dollars' worth of tokens to be issued.

Real-Time Auditability

The amount of gold represented by the issued GAT can be verified against the gold holding balance on Gold Apple Wallet accounts, posted by Gold Apple on their website.

Safe Storage of Value

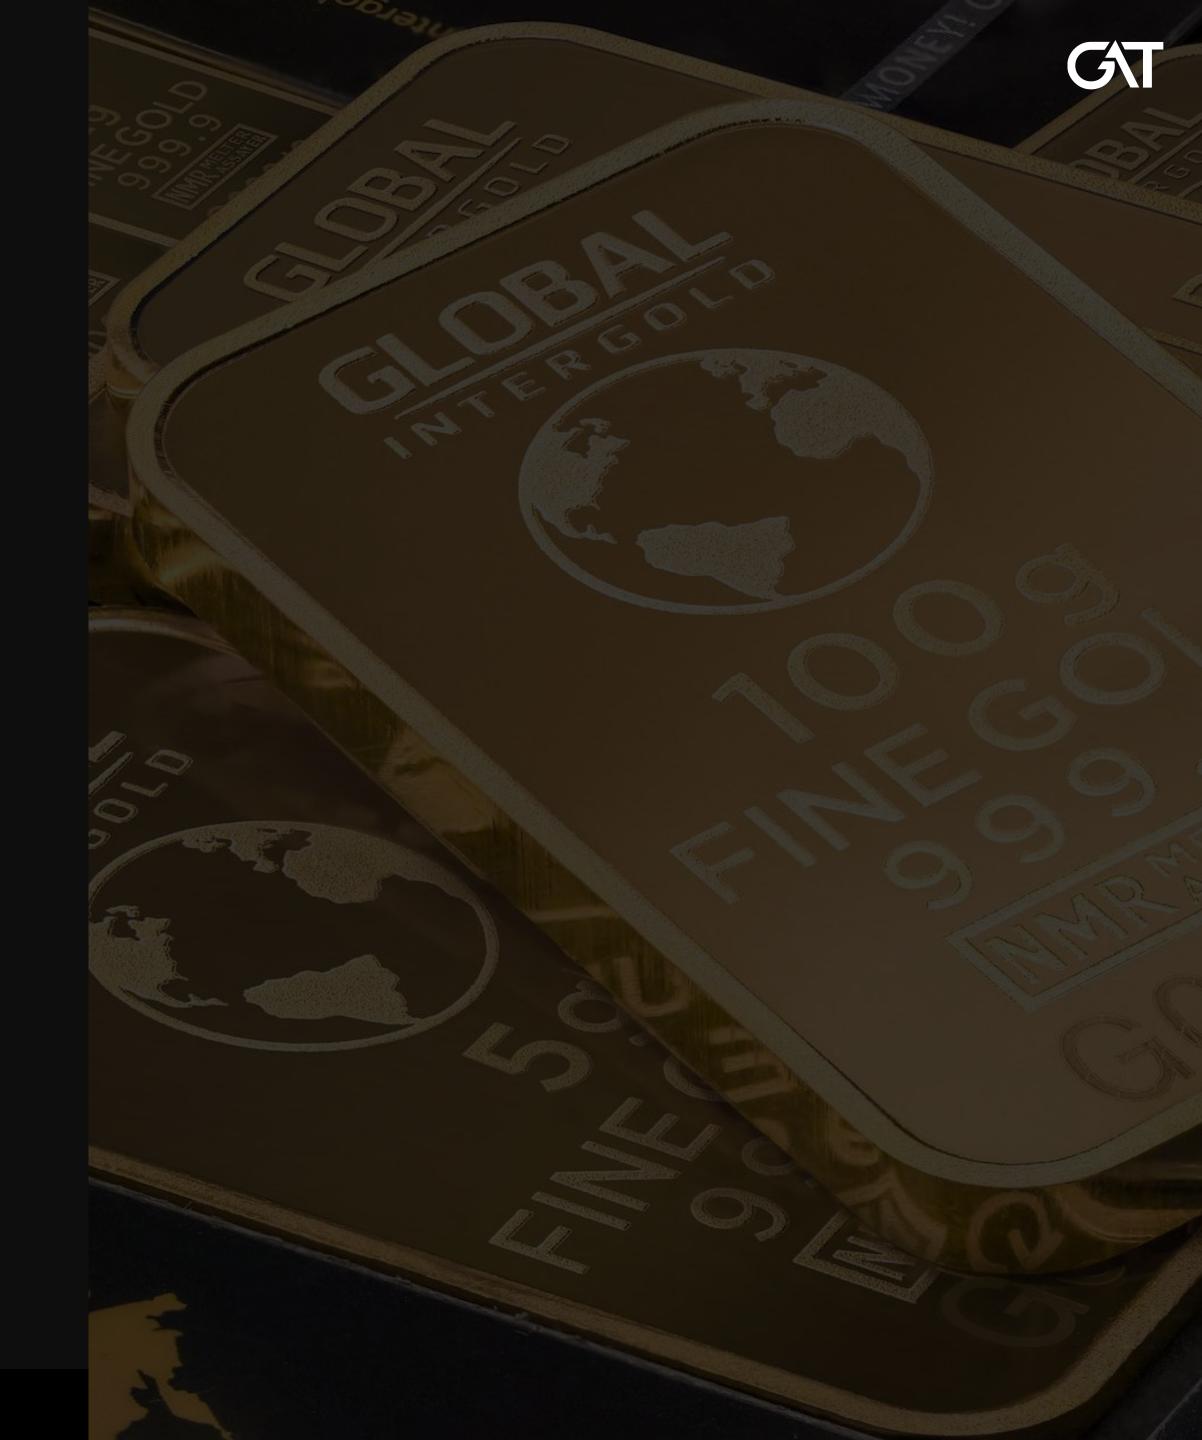

GAT revolutionizes digital asset investment by introducing official-grade gold to the blockchain, combining gold's historical value stability and inflation hedge with modern technology.

Blockchain

Cost efficient, secure and trusted: Gold Apple is a desirable product for individuals seeking to buy institutional-grade gold on the blockchain.

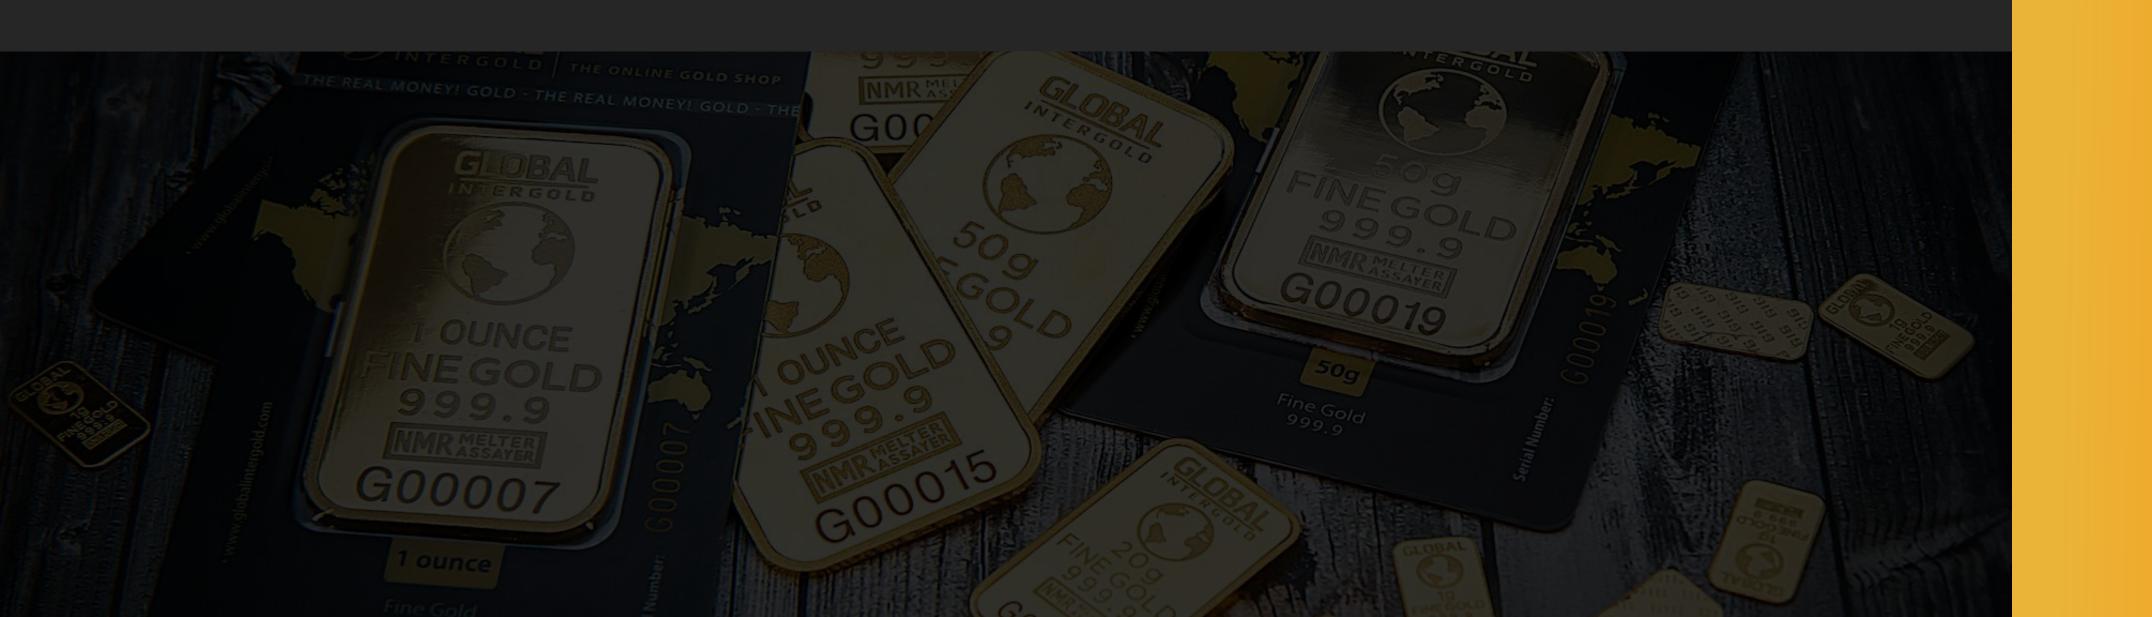

GAT Ecosystem

Global Gold Market and Its Enduring Value

The global gold market has long been a bastion of security and stability in the financial world. Gold's enduring value is attributed to its scarcity, universal appeal, and status as a hedge against inflation and currency devaluation. Despite fluctuations in the market, gold has maintained its worth and appeal as a safe haven for investors, underscoring its significance in global finance and investment portfolios.

GAT's Role in Digitized Gold Trading

GAT (Gold Apple Token) emerges as a transformative force, redefining the accessibility and efficiency of gold trading through digitization. Leveraging blockchain technology, GAT offers a secure and efficient platform for trading gold, introducing several key innovations:

Digitization and Security

GAT tokens represent real gold stored securely, combining the physical asset's tangibility with digital assets' liquidity and ease of transfer. This approach ensures that investors can own and trade gold without the logistical challenges of physical ownership.

Efficiency and Accessibility

By digitizing gold, GAT removes traditional barriers to entry in the gold market, making it accessible to a wider range of investors. The platform facilitates instant, secure transactions, enhancing liquidity and enabling more dynamic investment strategies.

Transparency and Trust

Blockchain technology ensures that all transactions within the GAT ecosystem are transparent, immutable, and secure. This transparency builds trust among users, who can verify the backing and authenticity of their digital gold holdings in real-time.

GAT

Ecosystem

Token's Role and Functionality

The GAT Token is the cornerstone of the Gold Apple Tree's blockchain ecosystem, allowing users to trade gold-backed NFTs via the Gold Apple Tree wallet, which is acquired through cryptocurrency exchanges.

Gold Apple Tree Wallet

This versatile blockchain wallet aims to support a variety of business needs, acting as a hub for token exchanges, staking gold-backed NFTs, and providing detailed gold market insights. Transactions are securely and transparently verified on the blockchain for reliability and trust.

Facilitating Token Swaps

The ecosystem supports smooth token swaps between GAT tokens and gold-backed NFTs. These NFTs are valued based on the current GAT token price and LBMA gold prices, offering an innovative way to convert digital assets into physical gold through Samsung Gold Co., Ltd. in Korea.

Staking Gold-Backed NFTs

A future feature will reward users for staking gold-backed NFTs with earnings derived from swap transaction fees. This encourages active participation and investment in the ecosystem, fostering a vibrant and engaging community.

Token Details

GAT BEP20 Tokens

GAT is initially created to implement into the Gold Apple ecosystem entitled with gaining reward and benefits among Gold Apple community as below.

Name	Gold Apple Token
Symbol	GAT
Technical Standard	BEP-20
Total Token Supply	1,000,000,000

GAT Distribution Plan

The GAT distribution plan outlines the allocation of tokens across five key categories to support the ecosystem's growth and sustainability:

- 1. Token Sales (45%): A significant portion is earmarked for investors and participants during token sales or initial coin offerings (ICO), acting as the primary funding mechanism for the project's development and expansion.
- 2. Market Expansion (25%): This allocation focuses on broadening the project's reach and establishing its presence in target markets. Funds are designated for initiatives such as entering new markets, forming partnerships, business development, and enhancing the adoption of project deliverables.
- **3. Advisors and Partners (10%):** Reserved for advisors, consultants, and strategic partners who provide essential expertise and guidance. This segment recognizes their role in advising on market trends, technologies, and strategies, offering tokens as incentives for their contributions.
- **4. Foundation (10%):** Set aside to support the ongoing development, maintenance, and governance of the project. These tokens fund software updates, protocol improvements, ecosystem maintenance, and ensure the project's long-term viability.
- **5. Marketing Operations (10%):** Allocated for promoting the project and increasing awareness. This includes advertising, public relations, social media campaigns, community engagement, and events aimed at drawing users, investors, and partners.

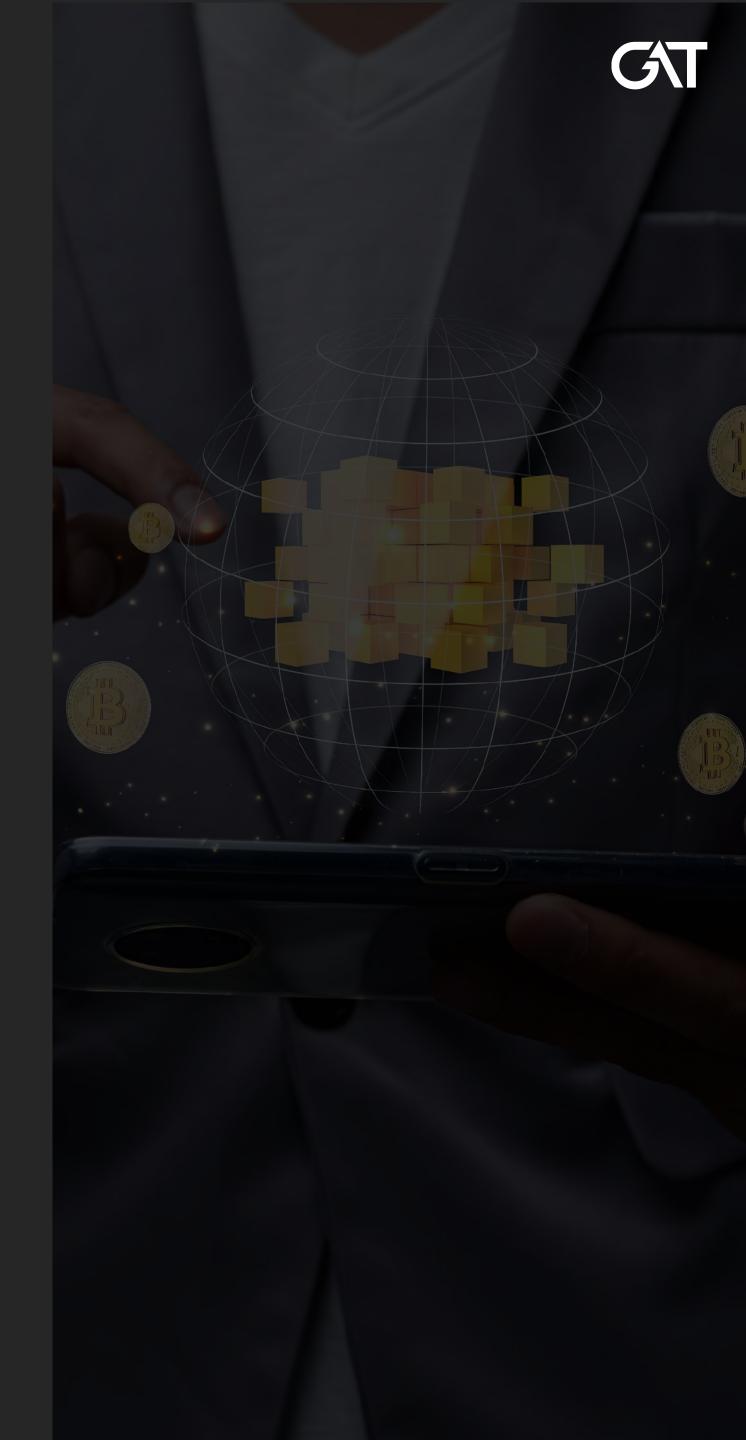

GAT Business Structure

Business Structure

- Core Operations: Enhancing gold trade via mine development and revenue from gold transactions.
- Innovative Products: Launching NFTs backed by gold transaction revenues.
- Strategic Partnerships: Collaborating with Samsung Gold Co., Ltd. and Korea Industrial Gold Exchange to boost gold trading profits.
- Revenue Model: Annual settlement with token burning (10% of profits) to reduce supply and enhance value. Profits distributed as stable coins for use in commercial activities and gold acquisition.
- User Ecosystem: Broadening the user base across precious metals, retail, and cryptocurrency exchanges to attract diverse investors.
- Legacy and Credibility: Leveraging over 40 years in the gold trading industry to ensure stability and expertise.
